SUMMARY OF FINDINGS

NOTE: Care should be taken in interpreting estimates for managerial employees which are given according to classification by occupation, as well as managerial/non-managerial status of employee. See paragraph 10 of the Explanatory Notes (page 80).

Distribution of Earnings

Diagram 1 shows the distribution of weekly total earnings of full-time adult employees by sector, as at May 1989.

Mean and median weekly total earnings in the public sector are considerably higher than those of full-time adult private sector employees, reflecting:

- the greater concentration of private sector employment in the lower paid manual and retail occupations; and
- the higher proportions of professionals and para-professionals in the public sector.

Full-Time Adult Employees —

Total Earnings(\$)

| | Mean | Median |
|----------------|--------|--------|
| Private Sector | 526.70 | 468.80 |
| Public Sector | 560.50 | 526.80 |

See Table 7 for more details.

Earnings by Occupation

Diagram 2 illustrates comparative weekly total earnings of full-time adult male and female employees as at May 1989. Occupation skill levels generally are directly reflected in earnings levels. The notable exception is male plant and machine operators, and drivers, who earn the highest average level of overtime of any of the major occupation groups (see Table 20).

Earnings by Industry

Diagram 3 shows average weekly total earnings of full-time adult male and female employees by industry.

For males, the Mining (\$815.90); Chemicals, petroleum and coal products manufacturing (\$670.10); Finance, property and business services (\$638.70); and Basic metal products manufacturing (\$636.50) industries recorded the highest levels of average weekly total earnings.

For females, the Mining (\$532.30); Community services (\$513.20); and Chemical, petroleum and coal products manufacturing (\$483.80) industries recorded the highest average weekly total earnings.

Lowest average weekly total earnings of full-time adult male employees was recorded in the Retail trade industry (\$461.60) and in the Textiles; Clothing and footwear manufacturing industry group (\$357.30) for females.

See Table 9 for details.

Composition of Earnings

Diagram 4 illustrates the major components of earnings of full-time adult non-managerial employees over the last four years, highlighting:

- the steady growth in levels of award or agreed base rate of pay;
- a marked increase in overaward payments from 1988 to 1989 for both males (18%) and females (31%) bringing this component up to the amounts reported in 1986;
- the relatively stable level of average overtime earnings of females compared to the increase in male overtime earnings over the same period; and
- no reduction in real terms in the gap between average weekly total earnings of full-time adult males and females.

Full-Time Adult Non-managerial Employees —

| | Award or Agreed Base Rate of Pay | | Average Weekly Total Earnings | |
|------|-------------------------------------|---------|----------------------------------|---------|
| | Males | Females | Males | Females |
| 1989 | 464.0 | 427.0 | 543.0 | 448.0 |
| 1988 | 432.9 | 395.8 | 500.3 | 413.3 |
| 1987 | 405.8 | 368.5 | 465.0 | 385.1 |
| 1986 | 382.0 | 347.4 | 439.3 | 362.7 |

Overtime Earnings

Average weekly total earnings for private sector employees are lower than that for public sector employees. However, full-time adult male employees in the private sector, who worked overtime in the reference period, received more overtime pay (\$168.10) than those in the public sector (\$141.30).

The average overtime earnings for full-time adult female employees working overtime in the private sector was \$80.90, which is lower than that received in the public sector, \$91.30.

See Table 6 for details.

EXPLANATORY NOTES

Introduction

This publication contains estimates obtained from a sample survey of employers conducted in May 1989. The survey is designed to provide statistics on the distribution of employees according to weekly earnings and hours, and on the composition of weekly earnings and hours for various categories of employees and principal occupations.

2. Preliminary estimates were published in *Distribution and Composition of Employee Earnings and Hours, Australia, May 1989, Preliminary* (6305.0) on 2 March 1990.

Scope of the survey

3. All wage and salary earners who received pay for the reference period are represented in the survey, except:

- members of the Australian permanent defence forces;
- employees of enterprises primarily engaged in agriculture, forestry, fishing and hunting;
- employees in private households employing staff;
- employees of overseas embassies, consulates, etc.;
- employees based outside Australia; and
- employees on workers' compensation who are not paid through the payroll.

4. Also excluded are the following persons who are not regarded as employees for the purposes of this survey:

- directors who are not paid a salary;
- proprietors/partners of unincorporated businesses; and
- self-employed persons such as subcontractors, owner/drivers, consultants and persons paid solely by commission without a retainer.

Survey design

5. A sample of approximately 9,600 employers is selected from the ABS register of businesses to ensure adequate State and industry representation. The statistical unit for the survey comprises all activities of an enterprise in a particular State or Territory. Each statistical unit is classified to an industry which reflects the predominant activity of the enterprise in the State or Territory. In a small number of cases where an enterprise has significant employment in more than one industry, a separate statistical unit is created for each industry. The statistical units are stratified by State, public/private sector, industry and

size of employment, and a simple random sample is selected from each stratum.

6. Employers with fewer than 12 employees are required to complete details for every employee, while those with 12 or more employees are required to select a random sample of their employees in accordance with instructions supplied by the ABS. Data for approximately 72,000 employees was obtained in the survey.

7. Although the sample is not designed specifically to provide estimates of numbers of employees, it is estimated that 3,143,000 male and 2,418,800 female employees are within the scope of the survey. These and other estimates of numbers of employees included in this publication should not be taken as measures of total employment in the categories indicated.

Industry classification

8. Industry is classified according to the *Australian Standard Industrial Classification (ASIC) 1983 Edition, Volume 1 — The Classification* (1201.0). The following table shows details of the ASIC industries used in the survey.

| ASIC code | | |
|-----------|--------------|--|
| Division | Sub-division | Title |
| B | | Mining |
| C | | Manufacturing |
| | 21 | Food, beverages and tobacco |
| | 23,24 | Textiles; Clothing and footwear |
| | 26 | Paper, paper products, printing and publishing |
| | 27 | Chemical, petroleum and coal products |
| | 29 | Basic metal products |
| | 31,33 | Fabricated metal products; other machinery and equipment |
| | 32 | Transport equipment |
| | 25,28,34 | Other manufacturing(a) |
| D | | Electricity, gas and water |
| E | | Construction |
| F | | Wholesale and retail trade |
| | 47 | Wholesale trade |
| | 48 | Retail trade |
| G | | Transport and storage |
| H | | Communication |
| I | | Finance, property and business services |
| J | | Public administration and defence(b) |
| K | | Community services |
| L | | Recreation, personal and other services(c) |

(a) Includes wood, wood products and furniture (subdivision 25); glass, clay and other non-metallic mineral products (subdivision 28); leather, rubber and plastic products and manufacturing not elsewhere classified (subdivision 34). (b) Excludes permanent defence forces. (c) Excludes private households employing staff (subdivision 94).

NOTE: Division A, (Agriculture, Forestry, Fishing and Hunting) is excluded from the survey.

Occupation

9. Occupation is classified to the Australian Standard Classification of Occupations (ASCO).

10. Care should be taken when comparing survey estimates based on ASCO groups with estimates based on the managerial/non-managerial status of employees, which is determined by the employer. Estimates for employees with manager status include employees classified to ASCO categories other than the ASCO major group 'Managers and Administrators'; e.g. employees classified as Professionals according to ASCO may be categorised by employers as having managerial status. Conversely, tables in this publication which contain estimates for non-managerial employees (as defined by employers) will include some employees who would be classified to the ASCO major group 'Managers and Administrators'.

11. Details of ASCO can be found in *ASCO: Statistical Classification — First Edition* (1222.0), and an *Information Paper: ASCO — Australian Standard Classification of Occupations: Introduction to ASCO Publications - First Edition* (1221.0) which were released in September 1986.

Comparability of results

12. Because of the substantially improved coverage of employers provided by the ABS register of businesses and modifications to some definitions, results from surveys conducted after 1981 are not strictly comparable with those for surveys conducted between 1974 and 1981. In addition, care should be taken when comparing the results of this survey with the quarterly series *Average Weekly Earnings, States and Australia* (6302.0), as a different sample design and survey methodology are used.

13. Because of the two stage sampling methodology used for this survey to arrive at a sample of employees, it is not possible to ensure that the representation of all the subgroups of interest in the sample accurately reflect their representation in the population.

14. Considerable care is taken in questionnaire design and in the instructions given to employers on how to select samples of their employees. All survey returns are subjected to careful editing to detect reporting errors, inconsistencies and transcription errors. Ultimately, however, the quality of survey results depends on the quality of the information provided by survey respondents and adherence to specified procedures.

Reliability of estimates

15. For information on the reliability of estimates see the Technical Note (Appendix A).

Related publications

16. Users may also wish to refer to the following publications which are available on request:

17. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Unpublished statistics

18. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, computer printout or clerically extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made to Regina Camara on Canberra (06) 252 5325 or to Information Services in the nearest ABS office.

Symbols and other usages

- * relative standard error greater than or equal to 25 per cent. See the Technical Note (Appendix A).

19. Estimates of earnings shown in the tables are rounded to the nearest 10 cents, and those of average weekly hours paid for are rounded to the first decimal place.

20. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Electronic services

DISCOVERY. Key *656# for selected current economic, social and demographic statistics.

AUSSTATS. Thousands of up-to-date time series are available on this ABS on-line service through PAXUS COMNET. For further

information phone the AUSSTATS Help Desk on (06) 252 6017.

TELESTATS. This service provides:

- foreign trade statistics tailored to users' requirements. Further information is available on (06) 252 5404.
- text and tables for selected Main Economic Indicator publications. Further information is available on (06) 252 5405.

Floppy disk service

Selected ABS statistics are available on floppy disk. Further information is available on (06) 252 6684.

APPENDIX A TECHNICAL NOTE

Introduction

As the estimates in this publication are based on information relating to a sample of employers and employees, rather than a full enumeration, they are subject to sampling variability. That is, they may differ from the figures that would have been produced if the information had been obtained from all employers and all employees. This difference, called *sampling error*, should not be confused with inaccuracies that may occur because of imperfections in reporting by respondents or in processing by the ABS. Such inaccuracies is referred to as *non-sampling error* and may occur in any enumeration whether it be a full count or sample. Efforts have been made to reduce non-sampling error by careful design of questionnaires, detailed checking of returns and quality control of processing.

2. An asterisk appears against estimates in this publication where the sampling variability is considered too high for most practical uses (that is, a relative standard error equal to or greater than 25 per cent of the estimate - see paragraph 4 below).

Reliability of estimates

3. The sampling error associated with any estimate can be estimated from the sample results. One measure of sampling error is given by the *standard error*, which indicates the degree to which an estimate may vary from the value that would have been obtained from a full enumeration (the 'true' figure). There are about two chances in three that a sample estimate differs from the true value by less than one standard error, and about nineteen chances in twenty that the difference will be less than two standard errors.

4. Another measure of the sampling error is the *relative standard error*, which is obtained by expressing the standard error as a percentage of the estimate. Both measures are used in the following discussion of the reliability of the estimates

5. As it is not practicable to include the standard errors of all estimates in this publication, Tables A, B, C and D have been produced to give an indication of the magnitude of relative standard errors.

Distribution (Tables 1-3, 6, 7, 12-15, 23, 24, 30)

6. These distribution tables are based on estimates of numbers of persons in various ranges of earnings or hours. Table A on page 83 provides an indication of the magni-

tude of the standard error of estimates of numbers of employees for different employment estimates. An example of the use of the table in relation to Table 1 is as follows: the estimate for the earnings range \$340.00 to \$360.00 for Victorian males is 3.7 per cent of the total number of Victorian male employees. This represents approximately 32,300 males. The relative standard error of this estimate is approximately 8.7 per cent, i.e. 2,810 males. There are about two chances in three that a complete collection would have given a figure within the range 29,490 to 35,110 and about nineteen chances in twenty that the figure would have been within the range 26,680 to 37,920.

Average earnings and hours (Tables 4, 5, 8-11, 16-22, 25-29, 31, 32)

7. Tables B, C and D show relative standard errors for some estimates of average weekly earnings (both total and overtime). An example of the use of Table D is as follows: the estimated average total weekly earnings of full-time adult non-managerial males in the Retail trade industry is shown in Table 16 as \$426.90. Table D shows the relative standard error on this estimate to be 1.4 per cent (or approximately \$6.00). There are about two chances in three that a complete collection would give a figure within the range \$420.90 to \$432.90, and about nineteen chances in twenty that the figure would be within the range \$414.90 to \$438.90.

8. The following notes give indications of relative standard errors which are not covered directly by the tables.

Private/public sector. Relative standard errors relating to estimates of the private or public sector only are generally slightly higher than those for the private and public sectors combined.

Full-time adult employees. Relative standard errors are approximately the same as for full-time adult non-managerial employees (Tables B, C and D).

Full-time adult managerial employees. Relative standard errors are slightly higher than those for full-time adult non-managerial employees (Tables B, C and D).

Part-time adult non-managerial employees. Relative standard errors are generally 4 percentage points higher for males and 2 percentage points higher for females than those for full-time adult non-managerial employees (Tables B, C and D).

APPENDIX B GLOSSARY

Adult employees are employees 21 years of age or over and those employees who, although under 21 years of age, are paid at the full adult rate for their occupation.

Award pay or agreed base rate of pay refers to the award pay or agreed rate of pay for ordinary time hours paid for. For employees covered by an award it includes all allowances (dirt, height, tool, etc.) and penalty payments (e.g. shift loadings) specified in the award. It excludes overaward pay and service increments not specified in the award. For employees not covered by an award, agreed base rate of pay is the agreed wage for ordinary time hours paid for.

Employees refers to all wage and salary earners (as defined in paragraphs 3 and 4 of the Explanatory Notes) who received pay for any part of the reference period.

Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

Industry is classified according to the Australian Standard Industrial Classification (see Explanatory Notes paragraph 8).

Junior employees are those employees who are not adults as defined.

Managerial employees are adult managerial, executive, professional and higher supervisory staff, generally defined as those employees who are ineligible to receive payment for overtime, or, although subject to payment for overtime, are in charge of a significant number of employees in a separate establishment.

Mean (or average) earnings or hours refers to the amount obtained by dividing the total earnings or hours of a group (e.g. full-time employees) by the number of employees in that group.

Median earnings or hours refers to the amount which divides the distribution into two equal groups of employees, one half having amounts below the median and the other half having amounts above it.

Non-managerial employees are those who are not managerial employees as defined.

Occupation is classified according to the Australian Standard Classification of Occupations (ASCO) (see Explanatory Notes paragraphs 9 to 11).

Ordinary time hours paid for refers to employees' award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours of work,

and that part of annual leave, paid sick leave and long service leave taken during the reference period.

Other pay refers to ordinary time earnings not included in award or agreed base rate of pay, allowances under award, overaward pay or payment by measured result. It excludes payments in the form of a reimbursement for expenses incurred whilst carrying out the employer's business (e.g. payments from petty cash).

Overaward pay refers to amounts of ordinary time pay (regular or otherwise) that are over the award (e.g. attendance, good time-keeping, profit-sharing, etc.). It excludes payments in the form of a reimbursement for expenses incurred whilst carrying out the employer's business (e.g. payments from petty cash).

Overtime hours paid for refers to hours in excess of award, standard or agreed hours of work.

Part-time employees are those who are not full-time employees as defined.

Payment by measured result refers to earnings which vary according to measured performance (e.g. piecework, production and task bonuses, and commission).

Percentiles refer to any of a hundred divisions of an earnings or hours series. For example, 25 per cent of employees earn less than or equal to the 25th percentile and 75 per cent of employees earn less than or equal to the 75th percentile.

Reference period for the survey refers to the last pay period ending on or before 18 May 1989.

Sector. Public sector includes local government authorities and all government departments and agencies created by, or reporting to, the Commonwealth or State Parliaments. All remaining employees are classified as private sector.

Weekly ordinary time earnings of employees refers to one week's earnings for the reference period attributable to award, standard or agreed hours of work. It is calculated before taxation and any other deductions (e.g. superannuation, board and lodging) have been made. Included in ordinary time earnings are award payments, base rates of pay, overaward payments, penalty payments, shift and other allowances; commissions and retainers; bonuses and similar payments related to the reference period; payments under incentive or piecework; payments under profit-sharing schemes normally paid each pay period; payments for leave taken during the reference period; all workers' compensation payments made through the payroll; and salary payments made to directors. Excluded are overtime payments, retrospective pay, pay in advance, leave loadings, severance pay, termination and redundancy payments and other payments not related to the reference period.

Weekly overtime earnings of employees refers to payment for hours in excess of award, standard or agreed hours of work.

Weekly total earnings of employees is equal to weekly ordinary time earnings plus weekly overtime earnings.

Weekly total hours paid for refers to the hours for which payment was made. It comprises ordinary time hours and

overtime hours. For employees paid other than weekly, hours were converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the reference period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Hours of work were not reported for managerial employees.

APPENDIX C ADDITIONAL DATA AVAILABLE ON REQUEST

A range of unpublished data is available from the Survey of Employee Earnings and Hours on request. The populations and variables available are listed below.

A. POPULATIONS

The variables listed below are available in respect of each of the following populations:

B. VARIABLES

The following variables are available from this survey subject to the reliability of the estimates. An indication of relative standard errors for most variables is provided in the Technical Note (Appendix A).

Composition of earnings and hours paid for

Average weekly total earnings
Average weekly ordinary time earnings
Award or agreed base rate of pay (includes allowances)
Overaward and other pay
Payment by measured result
Overtime

Average hourly earnings

Average weekly total hours paid for
Average weekly ordinary time hours paid for
Average weekly overtime hours paid for

Distribution of earnings and hours paid for (a)

Distribution of weekly total earnings
Distribution of weekly ordinary time earnings
Distribution of weekly overtime earnings

Distribution of weekly total hours paid for
Distribution of weekly ordinary time hours paid for
Distribution of weekly overtime hours paid for

| Occupation | Size of firm (number of employees) |
|---|------------------------------------|
| ASCO major group (as shown in Table 8) | Under 20 |
| ASCO minor group (2 digit codes eg. Table 5) | 20 - 49 |
| ASCO unit group (4 digit codes eg. Table 19) | 50 - 99 |
| | 100 - 499 |
| | 500 - 999 |
| | 1,000 and over |

(a) Earnings and hours ranges can be specified to suit individual requirements.

C. HOW TO PLACE AN ORDER

Firstly, determine the population (from A above) and the variables (from B) that you require estimates for. A covering letter indicating these requirements and the uses of the data requested should be returned to:

Assistant Director
Labour Income and Disputes Sub-section (W41c)
Australian Bureau of Statistics
P.O. Box 10
Belconnen ACT 2616

If you wish to discuss individual requests, especially in regard to the reliability of estimates for particular cross-classifications, before you place an order please phone Regina Camara on Canberra (06) 252 5325.
